EDUCATION

Lovely Professional University Data Science MBA	Punjab 2024 - 2026
St. Xaviers College Commerce(Accounts) B.Com	Ranchi, Jharkhand 2017 - 2020
The Institute of Cost Accountant Of India Cost and Management Accounting CMA	Ranchi, Jharkhand 2017 - 2020
Sacred Heart Convent School Degree in Matriculation	Daltonganj, Jharkhand 2012 - 2014

EXPERIENCE

Kanini Software Solutions Data Scientist Contributed to the design and delivery of AI and GenAI solutions for enterprise clients across ESG and cloud analytics domains. Led initiatives involving Large Language Models (LLMs) and prompt engineering to streamline and automate domain-specific workflows. Collaborated with cross-functional teams to build scalable, AI-powered applications that enhanced auditing, reporting, and decision-making. Engineered robust AI pipelines, from data extraction and preprocessing to model experimentation and integration, leveraging cloud-based infrastructure and modern GenAI frameworks. Worked with Azure Databricks and Blob Storage to analyze large-scale telemetry log data from Azure AppInsights. Built an AI/ML solution on Azure to help users detect AppInsights more effectively by conducting large-scale Exploratory Data Analysis (EDA) on Azure log data. Applied Time Series Forecasting models to predict web traffic trends for targeted resource allocation.	Noida July 2022 - June 2024
NCR Eduservices Maths Expert 1. Designed and delivered tailored lesson plans for the UK curriculum (SATs and GCSEs) across algebra, geometry, statistics, and calculus. 2. Structured lesson plans covering algebra, geometry, statistics, and calculus. 3. Supported diverse learner profiles with adaptive teaching strategies. 4. Engaged students through interactive discussions, fostering critical thinking.	Noida Jan, 2022 - July, 2022
Almabetter Data Science trainee - Conducted targeted data analysis to respond to and anticipate stakeholder needs, driving enhancements in business efficiency and productivity. - Provided actionable insights for informed decision-making. - Developed and maintained dynamic visualizations by integrating diverse data sources, providing comprehensive business insights. - Developed various machine learning algorithms tailored to various business use cases.	July 2021 - December 2021

SKILLS

Programming Languages:	Python, SQL
Libraries/Frameworks:	Scikit-Learn, Pandas, Tensorflow, Langchain, FastAPI, Flask, Keras, OpenCV, Transformers, Hugging Face, Rest-API, Sci-py, MLFlow
Tools / Platforms:	VS-Code, Azure Cloud, AWS S3, Azure Data Factory, Azure Data Lake Storage, Azure AI Studio, Azure AI Search, Deep Learning, Machine Learning, Computer Vision, Large Language Models, Bert, LLama, Gemini API, Plotly, PowerBI, Excel, MS-Office, NLP, Openai, GPT-4, Azure Form Recognizer, AI Agents
Databases:	MySQL, Azure Cosmos DB, PostgreSQL

PROJECTS / OPEN-SOURCE

Podcast Generator	<i>Python,LLM, Azure Cognitive Services, Streamlit, GenAI (Azure GPT)</i>
--------------------------	---

Orchestrated autonomous functional agents to generate podcast titles, structured content plans, and multi-speaker scripts using Azure GPT.

Designed prompt engineering flows with LLMs to produce coherent, role-specific multi-speaker dialogue and structured summaries.

Built an intuitive web interface to enable user-driven input selection and dynamic content configuration. Structured the overall system using modular agents to ensure exhibity, scalability, and streamlined generative workows.

ESG Readiness *Python, Azure AI Studio, Azure Cognitive Search, Form Recognizer, LLM, Django*

- Collaborated with stakeholders to gather and organize data from various sources.
- Leveraged OpenAI APIs and Langchain for ESG Studio Workflows which reduced the manual workflow of ESG practioner by 90%.
- Integrated machine learning APIs into the application. Established comprehensive logging and tracing with AppInsights for monitoring.
- Explored various LLMs including GPT-3.5, GPT-3.5 Turbo, GPT-4, and GPT-4 Turbo from Azure OpenAI, as well as open-source LLMs like LLama, Mixtral, and Gemini Pro APIs for development tasks.
- Optimize chatbot performance and scalability through rigorous testing and iterative improvements.

Log Analytics *Python, Forecasting, PowerBI, Databricks*

Engineered a time-series forecasting solution to predict server traffic patterns and API downtimes using Azure telemetry logs.

Built PowerBI dashboards for real-time monitoring and resource planning, enabling proactive scaling of backend infrastructure.

CERTIFICATIONS

- Data Science Specialization - **IBM**
- Hacker Rank Python Certification - **Hacker Rank**
- Azure Data Science training - Microsoft.
- ICWA(Intermediate Cleared) - ICWAI.
- MH-CET Law Enterance Exam - Cleared(2017).
